VALUE ADDED PROGRAMMES (2018-2019)

Dear students,

We would like to host “value added course program” in our MNR dental college, Sangareddy, through interdepartmental collaboration. This is line with our goal of enriching our students with essential skills to succeed in professional life. Interested students are asked to contact curriculum committee members. We are hoping to hear a positive response from your side.

1. AWARENESS PROGRAMME ON FACIAL SPACE INFECTIONS
2. FULL MOUTH REHABILITATION
3. MANAGEMENT OF TMJ DISORDERS
4. IMMUNO HISTOCHEMISTRY
5. AWARENESS PROGRAMME ON MEDICAL EMERGENCIES
6. PERIODONTAL INSTRUMENTATION
7. INFLUENCE OF SYSTEMIC DISEASES ON PERIODONTIUM
8. DEMO ON CONSCIOUS SEDATION
9. FUNCTIONAL PEDOMETRICS
10. EXAMINATION OF SALIVARY GLANDS
11. FORENSIC ODONTOLOGY
12. ODONTOGENIC INFECTIONS
13. BROKEN INSTRUMENT MANAGEMENT OF ENDODONTICS

VALUE ADDED PROGRAMME

PROGRAMME SHEET

<u>DATE</u>	<u>TOPIC</u>	<u>SPEAKER</u>
4-07-2018 and 5-07-2018	Facial Space infections	Dr. K.RAMESH Dr. G. HARSHA

NAME OF THE PROGRAMME: Awareness programme on Facial Space infections

JUSTIFICATION: Mostly an ignored or ill-treated decayed tooth becomes a root cause for the life threatening infections. Treatment of localised infection was probably the first primitive procedure to be done. Great number of medically compromised patients with altered defense mechanisms, the change of oral microbial flora towards more resistant forms and altered efficacy of conventional antibiotic therapy has increased the potential for serious sequelae of dental infections.

NAME OF THE FACULTY:

Dr. G. Harsha

Dr. K. Ramesh

Dr. Aditya

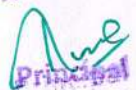

Dr. Srilatha

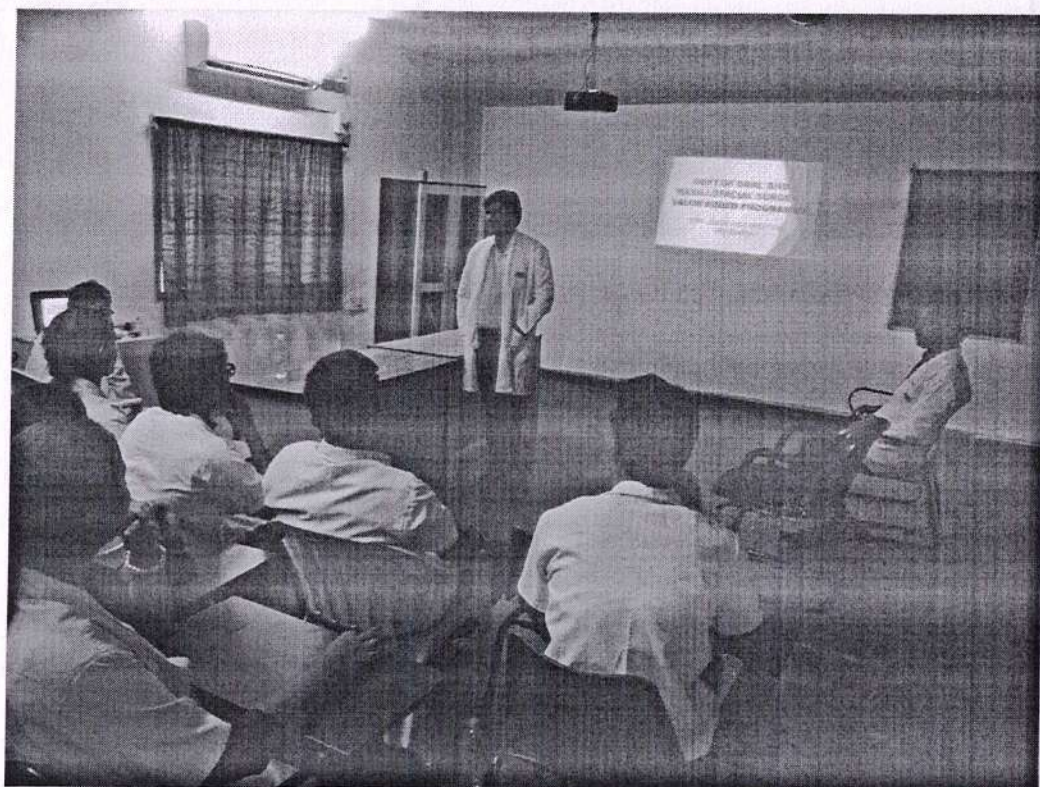

NUMBER OF STUDENTS ATTENDED: 50

The 2 day program was conducted 4-07-2018 and 5-07-2018. The session began with a welcoming note by Dr. Aditya. The speaker of the program was Dr. G. Harsha. The speaker Dr. G. Harsha addressed the delegates and students and welcomed their presence. A detailed Powerpoint presentation was given on the topic of Facial space infections and their management were also discussed in detail. Queries of the delegates were welcomed and answers to the topic were discussed by the organising committee. The session was concluded by Dr. Ramesh speech.

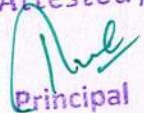

REPORT OF THE ACTIVITY:

Curricular activity of the department is deficient so we have conducted the value added courses so as to improve the curriculum.

VALUE ADDED PROGRAMME

Department Of Oral Pathology and Microbiology.

PROGRAMME SHEET

<u>DATE</u>	<u>TOPIC</u>	<u>ORGANIZER</u>
18.01.2019 and 19.01.2019	IMMUNO HISTO CHEMISTRY	Dr. SUREKHA V

NAME OF THE PROGRAMME: Immuno histochemistry

JUSTIFICATION: Prognosis of a disease depends on which stage the disease is diagnosed. Though one can diagnose a case by histopathology, there are many lesions which show to cytomorphological changes leading to difficulty in diagnoses. Though the cells change morphologically the intrinsic structure or components of the cell remain the same, which can be used to identify their parent nature. This identification of the cells through their intrinsic protein or chemical content is by immunohisto chemistry.

NUMBER OF STUDENTS ATTENDED: 50

CONDUCTED BY:

Dr. Prasanna M.D

Dr. Surekha V

Dr. Kranthi Kiran Reddy.E

Dr. Sangameshwar

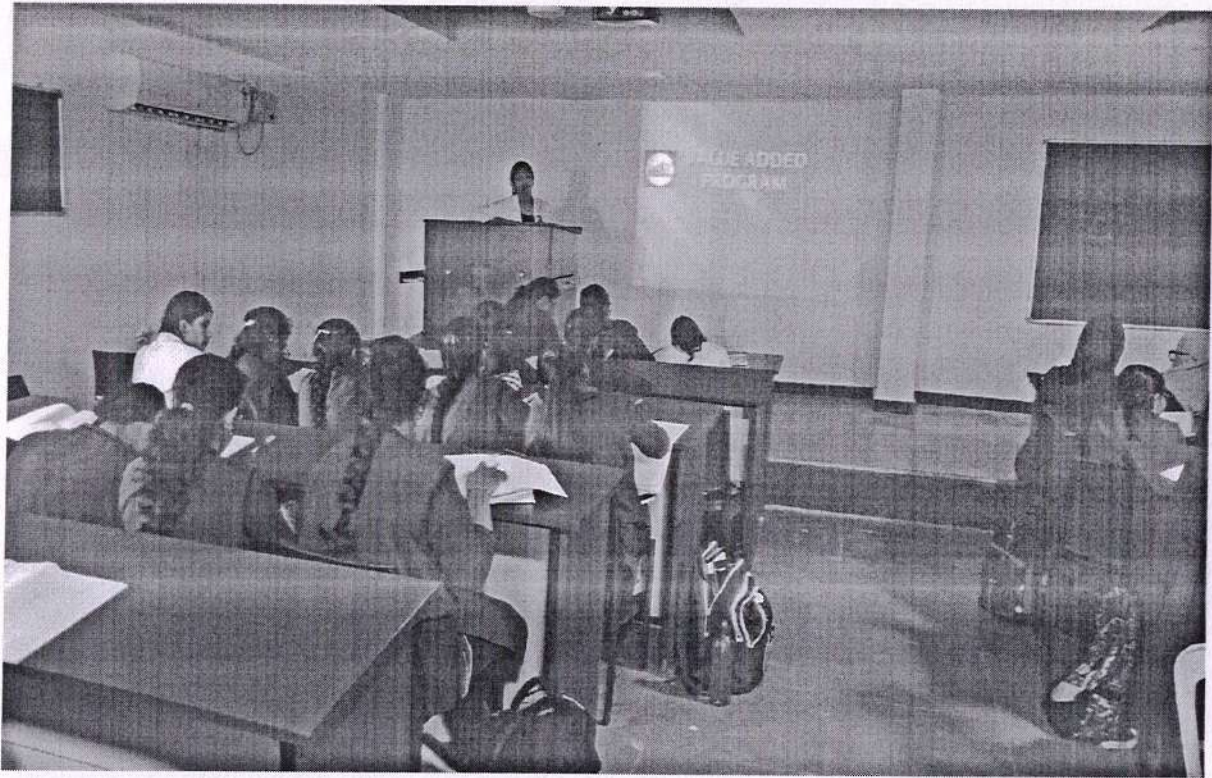

The program was conducted by Department of oral pathology and microbiology, in lecture hall 2, at MNR Dental College and hospital. Post graduate students and undergraduate students attended the session. Speaker Dr. Surekha highlighted the importance of understanding the basic structure and nature of the cell there by implicating in best diagnosis.

REPORT OF THE ACTIVITY:

Curricular activity of the department is deficient so we have conducted the value added courses so as to improve the curriculum.

VALUE ADDED PROGRAMME

PROGRAMME SHEET

<u>DATE</u>	<u>TOPIC</u>	<u>SPEAKER</u>
22-01-2019 and 23-01-2019	MEDICAL EMERGENCIES	Dr. G. HARSHA

A) NAME OF THE PROGRAMME: Awareness programme on medical emergencies.

1) JUSTIFICATION: Mostly an ignored or ill-treated decayed tooth becomes a root cause for the life threatening infections. Treatment of localised infection was probably the first primitive procedure to be done. Great number of medically compromised patients with altered defense mechanisms, the change of oral microbial flora towards more resistant forms and altered efficacy of conventional antibiotic therapy has increased the potential for serious sequelae of dental infections.

2) NAME OF THE FACULTY ATTENDED:

1. Dr. Harsha
2. Dr. Ramesh
3. Dr. Aditya
4. Dr. Rathod Prakash

B) NUMBER OF STUDENTS ATTENDED: 21

C) The program was 2 day programme conducted on 22-01-2019 and 23-01-2019. The session began with a welcoming note by Dr. Aditya. The speaker of the program was Dr. G. Harsha. The speaker Dr. G. Harsha addressed the delegates and students and welcomed their presence.

A detailed power point presentation was given on the topic of medical emergencies and their management were also discussed in detail.

Queries of the delegates were welcomed and answers to the topic were discussed by the organising committee.

The session was concluded by Dr. Ramesh speech.

D) REPORT OF THE ACTIVITY: Curricular activity of the department is deficient so we have conducted the value added courses so as to improve the curriculum.

VALUE ADDED PROGRAMME

DEPARTMENT OF PERIODONTICS AND IMPLANTOLOGY

PROGRAMME SHEET

<u>DATE</u>	<u>TOPIC</u>	<u>SPEAKER</u>
18-02-2019 and 19-02-2019	Periodontal instrumentation	Dr. B. Rupa Rani

NAME OF THE PROGRAMME: Periodontal instrumentation

JUSTIFICATION: Re-Establishment and maintenance of periodontal health is the main objective of periodontal treatment. Removal of local factors like plaque and calculus are important to obtain a clean root surface is mandatory to achieve periodontal health. Periodontal instruments have been designed specifically to achieve this goal. Presently, there is a large range of instruments available.

CONDUCTED BY:

1. Dr. Ravi Varma Prasad
2. Dr. Anitha.B
3. Dr. Deepika. V

NUMBER OF STUDENTS ATTENDED: 50

The 2 day program was each day with break of 30 minutes from 11:00 – 11:30 am. The session began with a welcoming note by Dr. Anitha.B .The speaker of the program was Dr.B.Rupa Rani. The speaker Dr.B.Rupa Rani addressed the students and welcomed their presence.

A PowerPoint containing detailed description of instruments, classification of instruments, indications and contra-indications of each instrument, surgical instruments. A wide range of instruments available for removal of supra and sub gingival calculus, including ultrasonic devices, sickles, hoes, chisels and curettes. Surgical instruments with various shapes, sizes, and designs are available to help clinicians to efficiently perform the procedure. Queries of the delegates were welcomed and the answers of the topic were discussed by the organizing committee.

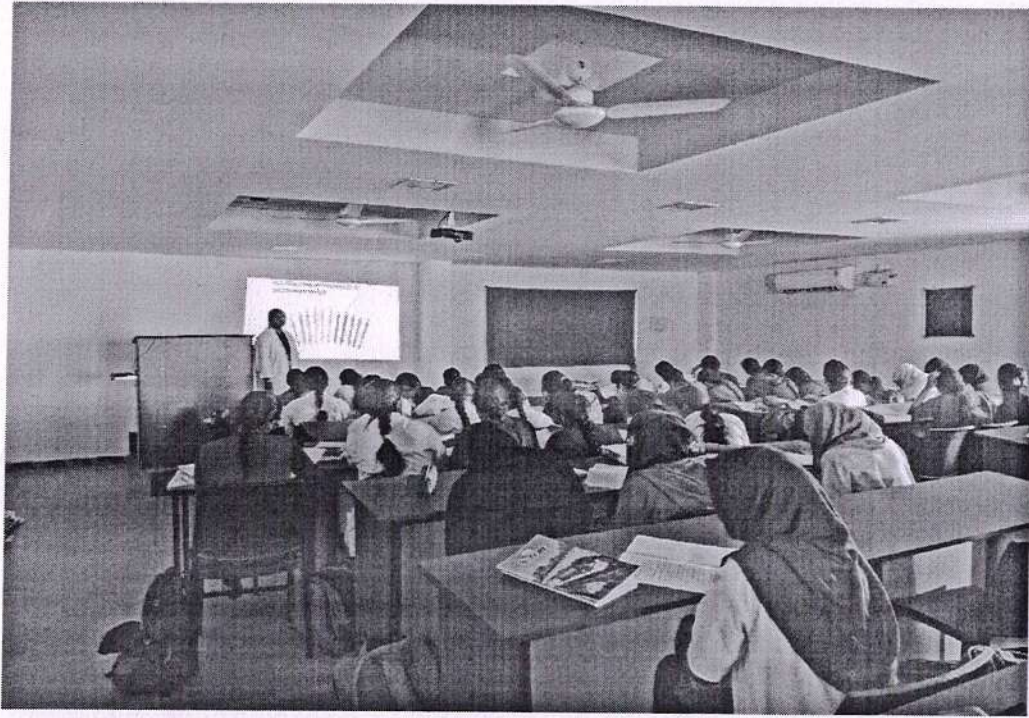

The session was concluded by Dr.Deepika.V

VALUE ADDED PROGRAMME

DEPARTMENT OF PERIODONTICS AND IMPLANTOLOGY

PROGRAMME SHEET

<u>DATE</u>	<u>TOPIC</u>	<u>SPEAKER</u>
13-3-2019 and 14-3-2019	Influence of systemic diseases on periodontium	Dr. K. Maruti

NAME OF THE PROGRAMME: Influence of systemic diseases on periodontium

JUSTIFICATION: A number of systemic diseases have been associated with manifestations on the periodontal tissues, the nature and severity of which may vary considerably. Systemic factors modify periodontitis principally through their effects on the normal immune and inflammatory mechanisms. Several conditions may give rise to an increased prevalence, incidence or severity of gingivitis and periodontitis.

CONDUCTED BY:

1. Dr. Ravi varma Prasad
2. Dr. Ruparani. B
3. Dr. Deepika. V

4. NUMBER OF STUDENTS ATTENDED: 50

The 2 day program was conducted on 13-03-2019 and 14-03-2019. The session began with a welcoming note by Dr.Ruparani.B .The speaker of the program was Dr.K.Maruti. The speaker Dr.K.Maruti addressed the students and welcomed their presence.

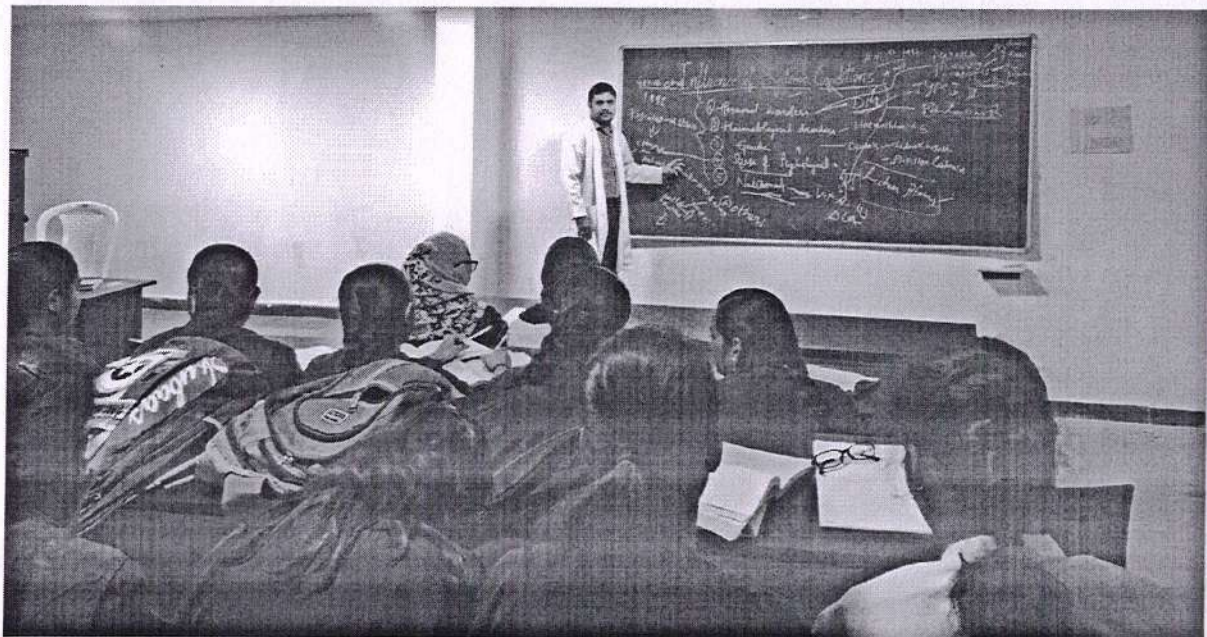

A PowerPoint containing detailed description about systemic conditions, periodontitis as a manifestation of systemic diseases, conditions associated with periodontitis and genetic conditions associated with periodontal diseases were explained in detail. Queries of the delegates were welcomed and the answers of the topic were discussed by the organizing committee. The session was concluded by Dr.Deepika.V

REPORT OF THE ACTIVITY:

Curricular activity of the department is deficient so we have conducted the value added courses so as to improve the curriculum.

DEPARTMENT OF PEDODONTICS AND PREVENTIVE DENTISTRY.

ACTIVITY REPORT

Title: Functional Pedometrics

Objective: Importance of Cephalometric analysis and Model analysis in diagnosis and treatment planning for Functional appliance cases

Date: 30 & 31st May 2019

Time: 10.00 am to 3.00 pm

Location: Lecture hall-II

Organised by: Faculty, Department of Pedodontics and Preventive dentistry

Audience: Post graduate students from Pedodontics and Orthodontics, Staff

Speaker: Dr. P.V. Yudistar, Prof and Head of the Department of Orthodontics and Dentofacial Orthopaedics, Mallareddy dental college.

Method adopted: Lecture followed by workshop

Materials used: PowerPoint presentation

Description: Mr.P.V.Yudistar gave lecture on Importance of Cephalometric analysis for treatment planning, Evidence based approach of functional appliances followed by hands on course on Cephalometrics and Model Analysis specific to Pediatric and Preventive dentistry.

NUMBER OF STUDENTS ATTENDED:24

The Department of Oral Medicine and Radiology at MNR Dental College organized an enlightening value-added program titled "Examination of Salivary Glands." The program took place from the 17th to the 24th of December 2018 in Lecture Hall 2, offering participants a comprehensive exploration of salivary gland examination techniques, disorders, diagnostics, and management strategies.

The program aimed to enhance dental students' knowledge and understanding of the critical role of salivary glands in oral health, the various assessment methods, and the management of salivary gland disorders. Eminent experts in the field were invited to share their insights and experiences, each focusing on specific subtopics related to the examination of salivary glands. The speakers, topics, and sequence were as follows:

Speaker: **Dr. Hema G**

Topic: **Anatomy and Physiology of Salivary Glands**

Topic: **Diagnostic Imaging of Salivary Glands**

Topic: **Fine Needle Aspiration Biopsy (FNAB) of Salivary Glands**

Topic: **Emerging Trends in Salivary Gland Research**

Speaker: **Dr. Satya Prakash**

Topic: **Clinical Evaluation of Salivary Gland Function**

Topic: **Salivary Gland Disorders and Pathologies**

Topic: **Surgical Management of Salivary Gland Disorders**

// ATTESTED //

Principal
MNR Dental College
SANGAREDDY

The sessions were marked by informative presentations, interactive discussions, and sharing of clinical insights and case studies. Each speaker provided a comprehensive overview of their assigned topic, incorporating research findings, practical applications, and emerging trends in the field of salivary gland examination. Dr Satya Prakash also demonstrated the examination of salivary glands by dividing the students into batches.

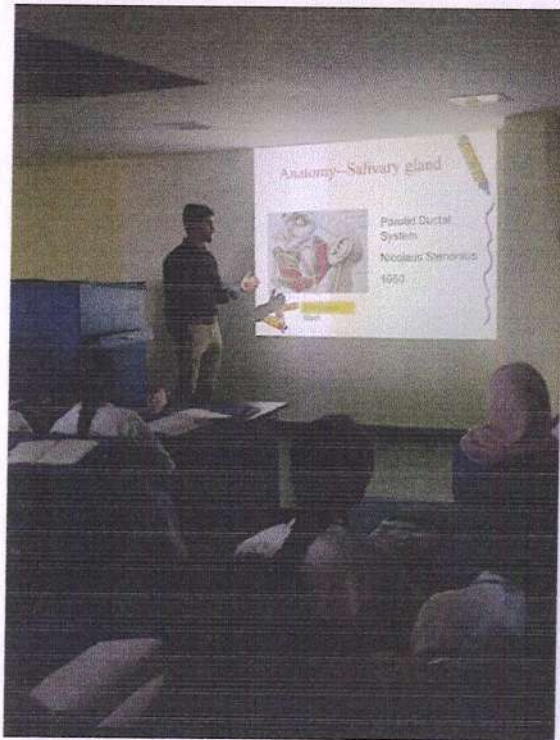

The program attracted enthusiastic participation from both undergraduate and postgraduate students, creating a dynamic platform for active learning and knowledge exchange. Participants engaged in discussions, raised pertinent questions, and contributed to insightful conversations that expanded their understanding of salivary gland examination.

We are pleased to report that all queries raised by the students were thoughtfully addressed, ensuring a thorough grasp of the intricate concepts discussed during the program.

The Value-Added Program on "Examination of Salivary Glands" concluded on a successful note, reaffirming the commitment of the Department of Oral Medicine and Radiology to promoting continuous learning and exploration within the dental community. The insights gained from this program will undoubtedly contribute to the participants' ability to appreciate the significance of salivary gland examination in comprehensive oral health care.

JUSTIFICATION:

Forensic odontology deals with identification of the suspect using the dental evidence found at the crime scene. It is based on the fact that no two mouths are alike and the unique characteristics aid in identification of the suspect. It includes age estimation, bite mark analysis, palatoscopy and rugoscopy. The students were given a power point presentation of the detailed methods of analysis along with demonstration of the frequently used methods

NUMBER OF STUDENTS ATTENDED: 31

The program was conducted by Department of oral pathology and microbiology, in lecture hall 2, at MNR Dental College and hospital. Post graduate students and undergraduate students attended the session. Speaker Dr. Surekha highlighted the importance of understanding the methods of forensic investigations and also reporting the evidence in real crime scenes

The Department of Oral pathology and microbiology at MNR Dental College organized a comprehensive value-added program on "Forensic Odontology." The program spanned from the 14th to the 21st of May 2019 and was conducted in Lecture Hall 2, offering participants an insightful journey into the intriguing world of forensic dental analysis and its critical applications.

The program aimed to enrich dental students' understanding of the significance of forensic odontology in various legal, investigative, and disaster response contexts. Eminent experts were invited to share their expertise, each focusing on specific subtopics within the realm of forensic odontology. The program's schedule, speakers, and topics were as follows:

Topic: Role of Forensic Odontology in Identification

Speaker: **Dr. Surekha**

// ATTESTED //

Principal
MNR Dental College
SANGAREDDY

Topic: Bite Mark Analysis in Forensic Dentistry

Speaker: **Dr. Prasanna**

Topic: Age Estimation through Dental Methods

Speaker: **Dr. Sangameshwar**

Topic: Postmortem Dental Records and Database Management

Speaker: **Dr. Surekha**

Topic: Role of Forensic Odontology in Mass Disasters

Speaker: **Dr. Prasanna**

Topic: Dental DNA Analysis and Forensic Odontology

Speaker: **Dr. Sangameshwar**

Topic: Legal Aspects and Expert Testimony in Forensic Dentistry

Speaker: **Dr. Surekha**

The sessions were characterized by engaging presentations, interactive discussions, and the sharing of practical insights and case studies. Each speaker provided a comprehensive overview of their respective topics, showcasing the multidisciplinary nature of forensic odontology and its pivotal role in various legal and investigative scenarios.

The program saw enthusiastic participation from both undergraduate and postgraduate students, creating a vibrant platform for active learning and knowledge exchange. Attendees actively participated in discussions, raising questions, and contributing to insightful conversations that expanded their understanding of the subject matter. We are pleased to report that all queries raised by the students were effectively addressed, ensuring a comprehensive grasp of the intricate concepts discussed during the program.

The Value-Added Program on "Forensic Odontology" concluded on a successful note, reaffirming the commitment of the Department of Forensic Odontology to fostering an environment of

NAME OF THE PROGRAMME: ODONTOGENIC INFECTIONS

NUMBER OF PARTICIPANTS: 42

JUSTIFICATION. An odontogenic infection is an infection that originates within a tooth or in the closely surrounding tissues. The most common causes for odontogenic infection to be established are dental caries, deep fillings, failed root canal treatments, periodontal disease, and pericoronitis. Odontogenic infection starts as localised infection and may remain localised to the region where it started, or spread into adjacent or distant areas.

It is estimated that 90-95% of all orofacial infections originate from the teeth. Furthermore, about 70% of odontogenic infections occur as periapical inflammation, i.e. acute periapical periodontitis or a periapical abscess. The next most common form of odontogenic infection is the periodontal abscess.

The Department of Oral and Maxillofacial Surgery at MNR Dental College organized a highly informative and engaging value-added program focused on "Odontogenic Infections." The program was conducted in Lecture Hall 2 and aimed to provide attendees with a comprehensive understanding of various aspects related to odontogenic infections in the context of oral and maxillofacial surgery.

The program spanned across several sessions, each hosted by esteemed experts in the field. The topics covered during the program and the respective speakers were as follows:

Topic: Classification of Odontogenic Infections

Speaker: **Dr. Harsha**

Topic: Microbial Etiology of Odontogenic Infections

Speaker: **Dr. Aditya A**

// ATTESTED //

Principal
MNR Dental College
SANGAREDDY

Topic: Spread and Complications of Odontogenic Infections

Speaker: **Dr. Ramesh K**

Topic: Clinical Presentation and Diagnosis of Odontogenic Infections

Speaker: **Dr. Prakash Rathod**

Topic: Imaging Modalities for Odontogenic Infections

Speaker: **Dr. Aditya A**

Topic: Surgical Management of Odontogenic Infections

Speaker: **Dr. Ramesh K**

Topic: Postoperative Care and Complications

Speaker: **Dr. Prakash Rathod**

The sessions were marked by in-depth presentations, interactive discussions, and the sharing of valuable clinical insights. Each speaker provided a comprehensive overview of their assigned topic, incorporating research findings, practical applications, and real-life case scenarios related to odontogenic infections in oral and maxillofacial surgery.

The program attracted a diverse audience of dental students, both undergraduate and postgraduate, who enthusiastically participated in the sessions. Attendees engaged in active discussions, raised relevant questions, and contributed to meaningful conversations that enriched their understanding of odontogenic infections and their management.

We are pleased to report that the program succeeded in addressing all queries raised by the students. The interactive nature of the program allowed participants to gain a clear understanding of the complexities associated with odontogenic infections and the diverse approaches to their management in the context of oral and maxillofacial surgery.

The Value-Added Program on "Odontogenic Infections" concluded on a positive note, reaffirming the commitment of the Department of Oral and Maxillofacial Surgery to promoting continuous

// ATTESTED //

Principal
MNR Dental College
SANGAREDDY

learning and sharing of knowledge within the dental community. The insights gained from this program will undoubtedly contribute to the participants' ability to diagnose, manage, and prevent odontogenic infections effectively.

The Department of Oral and Maxillofacial Surgery extends its gratitude to the speakers for their valuable contributions and to the students for their active involvement. The program not only enriched participants' knowledge but also fostered an atmosphere of inquiry, critical thinking, and excellence within the realm of oral and maxillofacial surgery.

VALUE ADDED PROGRAMME ON BROKEN INSTRUMENT MANAGEMENT

DEPARTMENT OF CONSERVATIVE DENTISTRY AND ENDODONTICS

DATE: 8-4-2019 TO 17-4-2019

PROGRAMME SHEET

Sn.O	TOPIC	SPEAKER	HOURS
1	Diagnosis and assessment	Dr. Vijetha	3 HOURS
2	Clinical considerations	Dr. Vijetha	3 HOURS
3	Removal techniques	Dr. Vijetha	4 HOURS
4	Magnification and illumination	Dr. Vijetha	3 HOURS
5	Expertise and referral	Dr. Vijetha	4 HOURS
6	Conclusion	Dr. Vijetha	3 HOURS

NAME OF THE PROGRAMME: Broken instrument management in Endodontics

NUMBER OF STUDENTS ATTENDED: 33

JUSTIFICATION: understanding the problem and Utilizing an appropriate and suitable technique leads to more successful management of the broken instrument.

CONDUCTED BY: Dr. Vijetha

// ATTESTED //

Principal
MNR Dental College
SANGAREDDY

The program was conducted by Department of Conservative dentistry and Endodontics, in lecture hall-1, at MNR Dental College and hospital. Post graduate students and undergraduate students attended the session. Speaker Dr. Vijetha highlighted the importance of techniques of broken instrument management.

REPORT OF THE ACTIVITY :

Diagnosis and assessment: When a broken instrument is encountered during treatment, the first step is to accurately diagnose and assess the situation. This involves radiographic evaluation to determine the location and extent of the instrument fragment within the root canal system. Understanding the position and size of the fragment is crucial in determining the appropriate management approach.

Clinical considerations: The decision on how to manage a broken instrument depends on several factors, including the location and size of the fragment, the stage of treatment, the potential impact on treatment outcomes, and the clinician's experience and skills. In some cases, the fragment may not significantly affect the treatment outcome and can be left in place. In other situations, the fragment may impede the progress of treatment or increase the risk of complications, requiring its removal.

Removal techniques: Various techniques can be employed to remove broken instruments from the root canal system. These techniques include ultrasonic vibration, use of specialized retrieval instruments (such as microhooks, microforceps, or Masserann kit), bypassing the fragment, or creating a bypass pathway to continue the root canal treatment. The choice of technique depends on factors such as the location and accessibility of the fragment, the size and type of the instrument, and the clinician's expertise.

Magnification and illumination: The use of magnification, such as dental operating microscopes or loupes, along with proper illumination, is crucial during broken instrument management. Magnification enhances visualization, allowing for better identification of the fragment and precise manipulation of instruments. Adequate lighting ensures clear visibility within the root canal, reducing the risk of further complications.

// ATTESTED //

Principal
MNR Dental College
SANGAREDDY

Expertise and referral: Managing broken instruments can be challenging and requires a high level of skill and expertise. In complex cases or situations where the clinician is uncertain about the best

CONCLUSION: It is important to note that each broken instrument case is unique, and the management approach should be tailored to the specific situation and patient. Close attention to detail, careful planning, and a systematic approach are essential for successful broken instrument management in endodontics. Regular professional development and training in advanced endodontic techniques can enhance the clinician's skills and confidence in dealing with these challenging scenarios.
