GREEN CAMPUS

In the present day, global warming is one of the main concerns and has led to catastrophic climate change in many parts of the world. MNR Institute has taken up the responsibility to create a green campus and instil a green lifestyle among the young and impressionable students by undertaking initiatives which help to lower the global temperature.

The carbon emissions are increasing the heat entrapment leading to rise of temperatures. There is a need of shift towards a carbon neutral and environment conscious living. MNR Institute has started the Green initiative as a step to make the campus as eco-friendly environment. The entire campus is constructed with an aesthetic touch marked by huge trees, paved pathways and greenery all around lending a serene atmosphere to this abode of education.

Many initiatives have been started in the campus with many eco-friendly by policies such as restricted entry of vehicles, usage of battery operated vehicles, use of alternate energy sources like solar energy, using recycled water with STP, maintaining diverse flora, trees in the campus. Steps have been taken with volunteer effort of staff and students through various projects such as Haritha haram, Environment Day etc.. Making the campus with more of plantations.

Sustainable environment in college campus impacts students lives positively on a daily basis as well. Studies have shown that students studying in active green campuses have better knowledge retention capacity, environmental behaviours, community solidarity, etc.
