### ACTIVITY REPORT

**Name of the Activity:** Gender equity vs equality

**Institution :** MNR Dental College & Hospital

**Resource person :** Dr. Hema

**Faculty Involved :** Dr. Surekha V, Dr Rupa

**Content Delivered:** Gender equality and gender equity are related terms but have different meanings. While the words sound similar, the definitions and practical usage are different. Equity sets the stage for equality, as it refers to the "fairness of treatment for both women and men, according to their respective needs." If equality is the end goal, equity is the means to get there.

**Description:** The dual meaning of the word equity presents both a challenge and an opportunity for business. A challenge because the distinction between gender equity and gender equality is unclear to most people, and bringing clarity and purpose to this conversation is an important step along the path to eliminating the gender equity gap. An opportunity because we now have the insights to open the eyes of individuals and business leaders as to this distinction, thereby making it possible to move forward along the journey to gender equality in the workplace.

The session got started with an explanation and learning about the meaning of both the terms as they sound similar to assume. This power point presentation was followed by an interaction with the students to assess what they comprehended and asked to come forward with any doubt regarding the presentation. We ended the session with vote of thanks delivered by Dr. Aditya Mohan.

**Audience :** Students and staff

**Attendance :** 60

**Conclusion :** The event ended with a short speech by Dr.Surekha on the topic of discussion.
