### CIRCULAR

The Department of Pedodontics and Preventive Dentistry is pleased to present a Value Added program on **Implants in Pediatric Dentistry**, scheduled from 22nd July 2020 to 23rd July 2020. This program will delve into the intricacies of using implants in pediatric dental care, providing participants with a comprehensive understanding of this specialized area.

For registration and additional details, please get in touch with the organizing team.

## VALUE ADDED PROGRAMME

### DEPARTMENT OF PEDODONTICS AND PREVENTIVE DENTISTRY

Date: 22.07.20 and 23.07.2020

#### PROGRAMME SHEET

DATE	TOPIC	SPEAKER
22-07-2020	Dental implants in a young child	Dr. Dwijendra.K. S
23-07-2020	Systematic planning	Dr. Pranitha

#### NAME OF THE PROGRAM: IMPLANTS IN PAEDIATRIC DENTISTRY

**JUSTIFICATION:** Dental implants in a young child would be an ideal mode of treatment for the absence of teeth. One of the main deterring factors for implant placement in children is the impending growth. Growth in the maxilla and mandible does not happen uniformly in one plane. It is multidirectional, occurring in sagittal, vertical, and transverse planes. It does not happen at a fixed pace; slow periods of growth are followed by phases of accelerated growth called the growth spurts. Successful implant treatment in children has been achieved by several clinicians when they incorporated a multidisciplinary approach in their treatment plan.

**OBJECTIVES:** The objective of the presentation was to understand the implications of growth and growth assessment and recommendations for the formulation of treatment plan in pediatric dental implant patients.

**METHOD OF CONTENT DELIVERY:** on 22<sup>nd</sup> the program started with a welcome speech and Power point presentation by Dr. Dwijender , followed by lunch break of half an hour and the program continued till 5 pm.

  
PRINCIPAL

MNR Dental College & Hospital  
MNR Nagar, Narsapur Road.  
SANGAREDDY Dist. - 502 294 (T.S.)

On 23<sup>rd</sup> the program started with the speaker Dr. Pranitha and systemic planning was explained in detail with a power point presentation followed by the vote of thanks.

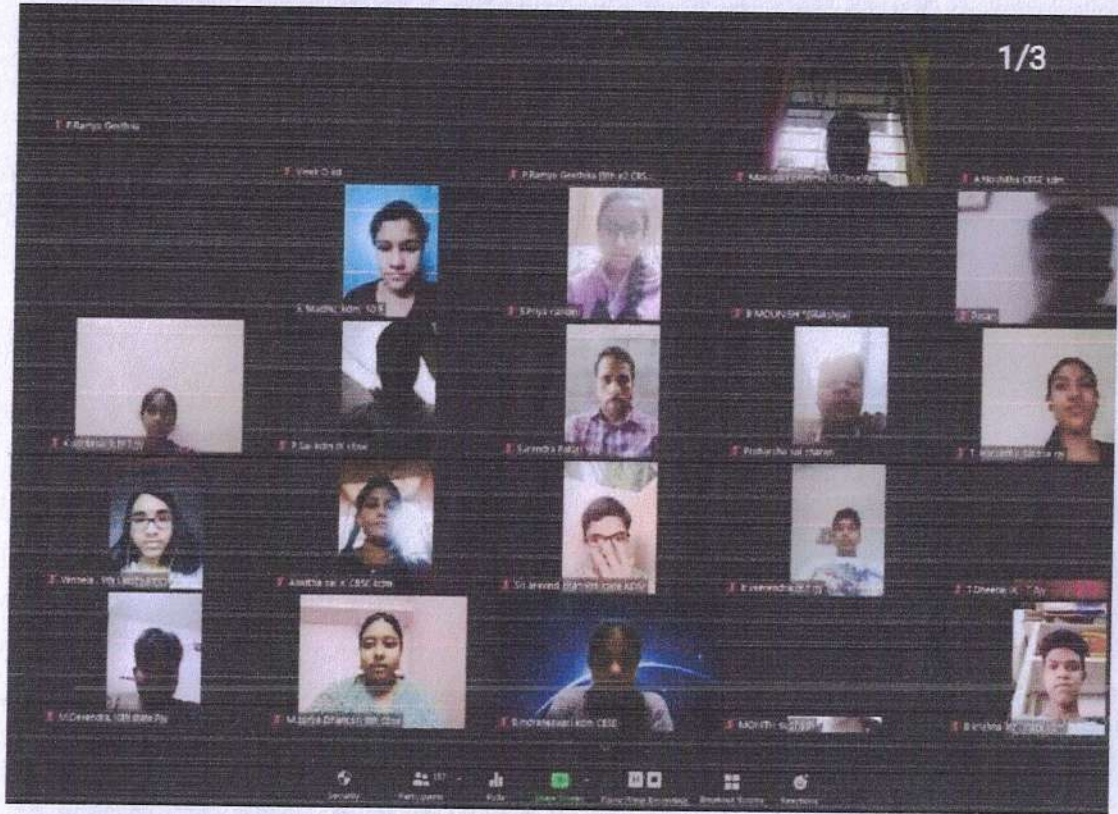

**BRIEF DISCUSSION:** Growth in the maxilla and mandible does not happen uniformly in one plane. It is multidirectional, occurring in sagittal, vertical, and transverse planes. It does not happen at a fixed pace, slow periods of growth are followed by phases of accelerated growth called the growth spurts. The teeth maintain their position in the arches by following this pace of growth through remodeling and drifting within the alveolar bone. Functional forces are balanced by a stable interarch occlusal relationship, achieved gradually as transition from primary to permanent dentition occur.

**CONCLUSION:** Dental implant insertion is a possible mode of rehabilitation in children and adolescents. Systematic planning of treatment can lead to desired esthetic and functional results. Growth assessment accompanied with alveolar bone evaluation should be done at the initiation of treatment planning. The orthodontic treatment and surgical treatment can be initiated about a year before the planned implant placement. This would utilize the period and create a greater chance for success after the implant insertion. The greater the physiologic harmony that can be created within the teeth, alveolar bone and growth, greater are the chances of successful implant placement in children.

## VALUE ADDED PROGRAMME

### DEPARTMENT OF PERIODONTOLOGY & IMPLANTOLOGY

#### WEBINAR ON SMART NAVIGATION COVID TIMES

5<sup>TH</sup> & 6<sup>TH</sup> SEPTEMBER 2020

**Institution:** MNR Dental College & Hospital

**NAME OF THE PROGRAMME:** SMART NAVIGATION

<u>DATE</u>	<u>TOPIC</u>	<u>SPEAKER</u>
05-09-2020	Nano technology	Dr. Neeraja Turagam
06-09-2020	Suturing and suture techniques	Dr. Durga Prasad Mudrakola

**Guest speakers:** Dr. Neeraja Turagam, Dr K.A. Ravi Varma Prasad; Professor & HOD, Department of Periodontology and Implantology; MNR Dental College, Sangareddy.

**Objective:** A lecture on nanotechnology and Suturing and suture techniques was conducted virtually to know their significance in dentistry.

  
PRINCIPAL  
MNR Dental College & Hospital  
MNR Nagar, Natsapur Road,  
SANGAREDDY Dist. - 502 294 (T.S.)

**Content delivered:** Periodontitis is a chronic inflammatory condition that can be treated by mechanical debridement along with systemic antimicrobials. However, various clinical forms of periodontitis are associated with different microbial floras and hence advances in treatment pattern that included local drug therapies that could resolve diseased condition locally without drug resistance and systemic involvement was discussed.

**Audience:** Staff, Interns, final years.

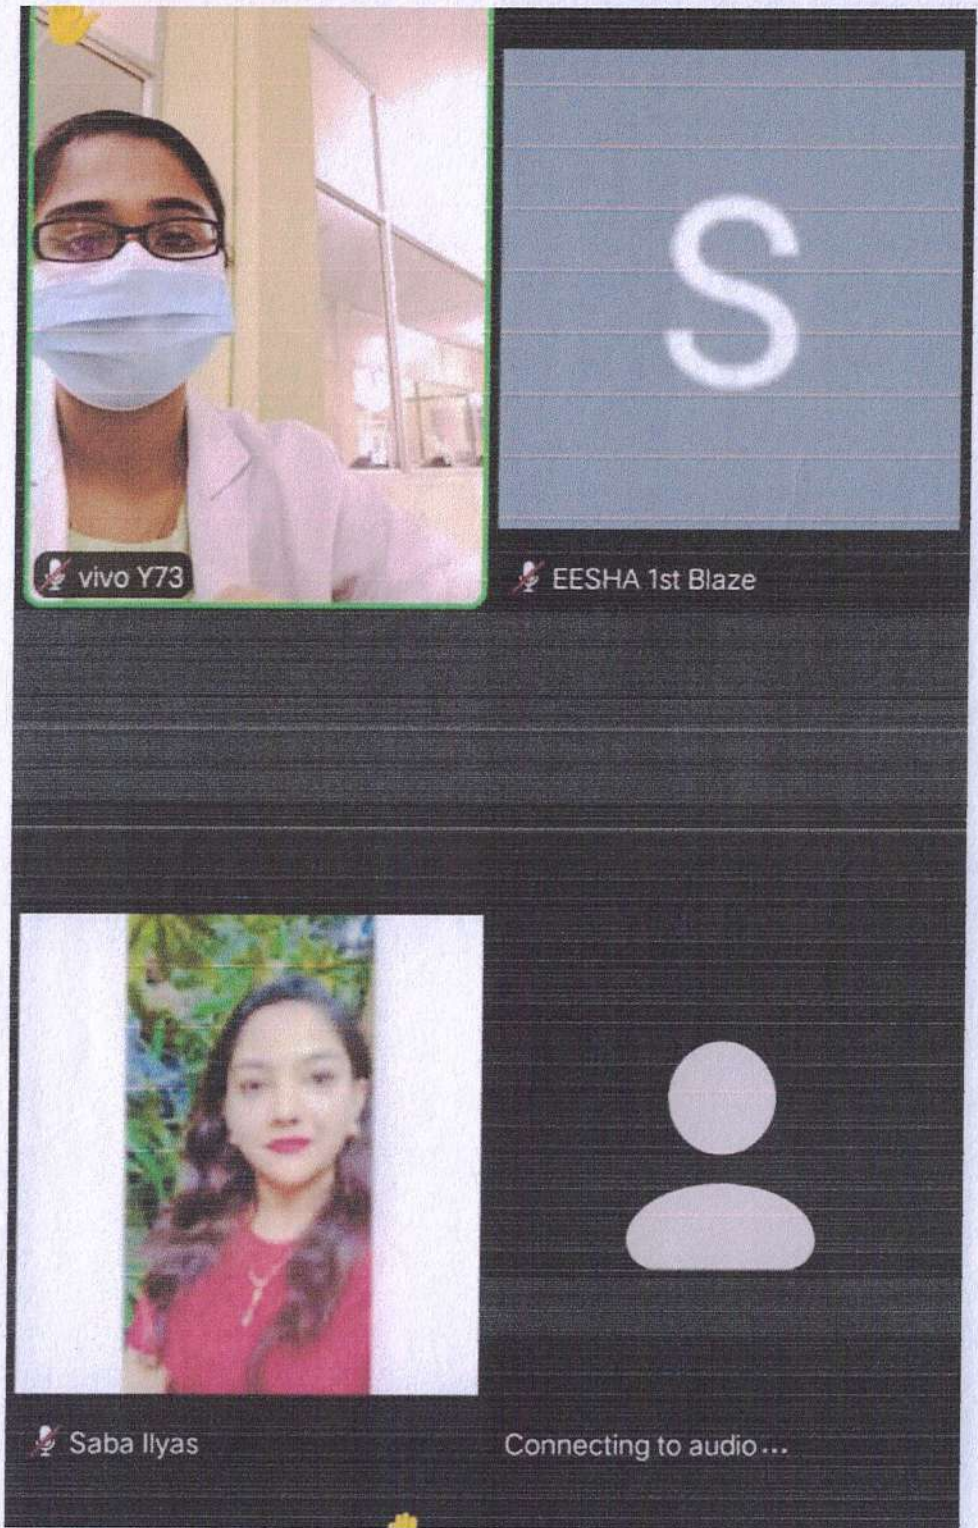

**Description of course:** The program was conducted on 5<sup>th</sup> September 2020. The event started with a welcome note by Dr. K.A. Ravi Varma Prasad and inauguration by Dr. Sujatha Gopal; Principal, Professor & HOD Department of conservative and endodontics; MNR Dental College at 9.00 am. This is followed by a detailed Power Point presentation by the guest speaker Dr. Neeraja Turagam who spoke about the Nano dentistry.

On 6<sup>th</sup> September 2020 Dr. Durga Prasad Mudrakola conducted on the topic "Suturing and suture techniques" from 9:00 am to 5 pm with a lunch break for half hour. He further spoke about the importance of suturing in periodontics and its recent advances such as the use of tissue adhesives modified suture materials with antibiotic impregnations and its need in periodontics today. He also emphasised on the need of micro sutures and suturing techniques. It was followed by group discussion with the staff and students. Later, Dr. Sujatha Gopal; addressed the gathering. The session was concluded with a vote of thanks.

## VALUE ADDED PROGRAMME

### DEPARTMENT OF ORTHODONTICS AND DENTOFACIAL ORTHOPEDECS

NAME OF THE PROGRAMME: INFECTION CONTROL

#### PROGRAMME SHEET

<u>DATE</u>	<u>TOPIC</u>	<u>SPEAKER</u>
28-01-2021	Methods of sterilization	Dr. Jayaprakash reddy
29-01-2021	Sterilization of dental instruments in dental clinic	Dr. Jayaprakash reddy

A) **JUSTIFICATION:** Infections present a significant hazard in the orthodontic office because they can be transmitted by blood or saliva through direct or indirect contact, droplets, aerosols, or contaminated instruments and equipment. Because the incidence of certain microbial cross-infections in the dental environment has not been well documented, orthodontic personnel may not take the problem of cross-infection as seriously as they should, and they may transmit or contract more infections than they realize.

Effective infection control must be a routine component of professional activity. The use of universal precautions in the management of all patients greatly minimizes occupational exposure to microbial pathogens. It is incumbent upon each orthodontist to conduct his practice in a manner that will not cause harm to anyone.

A) **CONDUCTED BY:**

- 1) Dr. Jaya Prakash Reddy ( HOD Department of orthodontics , MNR dental college and hospital )
- 2) Dr. Sujan kumar ( Professor, MNR dental college and hospital)

PRINCIPAL

MNR Dental College & Hospital  
MNR Nagar, Narsapur Road,  
SANGAREDDY Dist. - 502 294 (T.S.)

C) NUMBER OF STUDENTS ATTENDED:135

D) REPORT OF THE ACTIVITY:

The program was conducted via a Zoom meeting in which the speakers and students had virtually connected. Various methods of sterilization were discussed. The different methods of disinfection were stressed and a note on personal health care and PPE-personal protection equipment was also included as it was deemed important in the current situation of the prevailing endemic.

The program was conducted on 28-01-2021 for 8 hours from 09:00 am – 5:00 pm with a break of 30 minutes from 1:00pm -1:30 pm. The session began with a welcoming note by Dr.sujana kumar . The speaker of the program was Dr. JayaPrakash he addressed the students and welcomed their presence.

A detailed PowerPoint presentation was given on the topic of infection control in orthodontics and practically how to prevent possible spread of infectious diseases and also explained the need of dental professionals provided with up-to-date information that can be utilized to develop an optimal programme of asepsis.

On 29-01-2021 the program continued for 8 hours from 9:00am-5:00pm with a break of 30 minutes from 1:00pm -1:30 pm. The session continued with the sterilization of the instruments in the dental clinic.

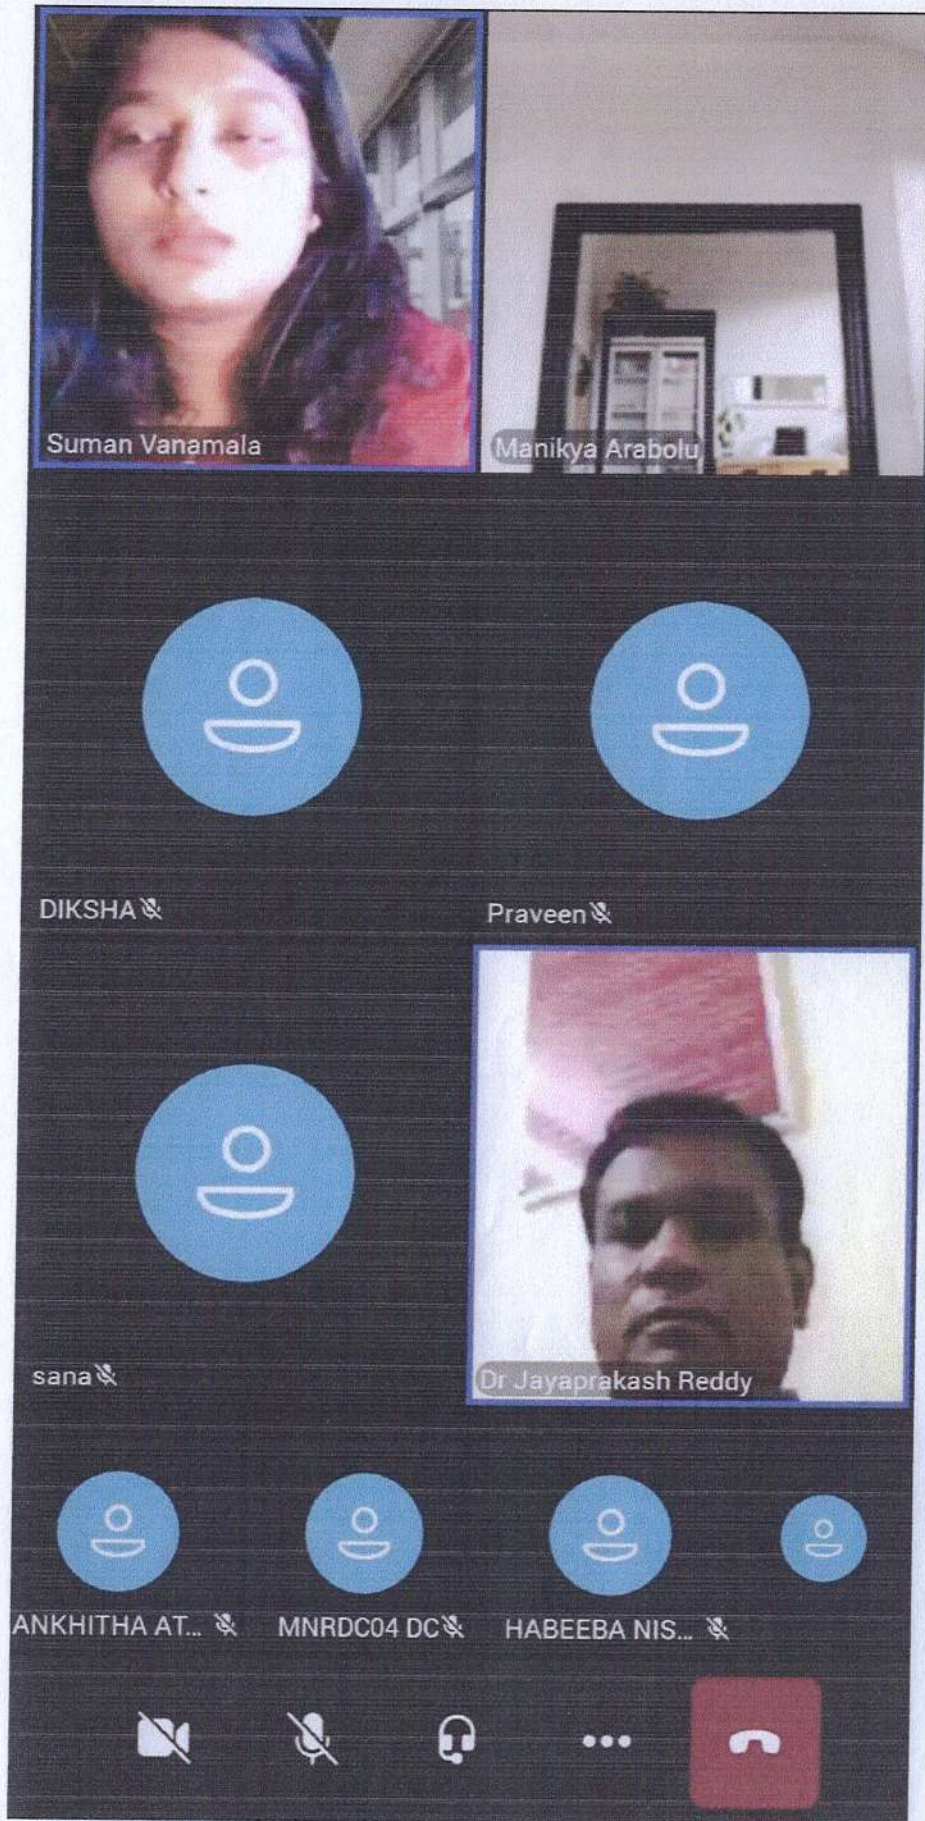

A detailed PowerPoint presentation was given on the topic the sterilization of the instruments in the dental clinic and practically how to prevent possible spread of infectious diseases by sterilization process.

The session was concluded with a vote of thanks by Dr.Sujan.

### CIRCULAR

The Department of Orthodontics and Dentofacial Orthopedics is pleased to announce a Value Added program on **Photography in Dentistry**, scheduled from 5th October 2020 to 31st October 2020. This program will delve into the art and science of dental photography, providing participants with essential skills for capturing clinical images.

For registration and additional details, please get in touch with the organizing team.

VALUE ADDED PROGRAMME

DEPT.OF ORTHODONICS AND DENTOFACIAL ORTHOPAEDICS

PROGRAMME SHEET

NAME OF THE PROGRAMME: Photography in dentistry

JUSTIFICATION: Photographs are vital in communicating with patients the outward view of their smile. Imperfections that are not readily visible to the patient will be apparent in still photographs. Thus, dental photography allows the patient to visualize his or her smile and oral condition with the same acute perspective as the dentist, which helps the patient understand the rationale for recommended treatment.

CONDUCTED BY:

1. Dr. Jayaprakash Reddy
2. Dr. Sujan Kumar

NUMBER OF STUDENTS ATTENDED: 57

The program was conducted in the month of October 2020. The session began with a welcoming note by Dr. Sujan Kumar. The speaker of the program was Dr.T.R. Jayaprakash Reddy. The speaker addressed the students and welcomed their presence. A PowerPoint containing detailed description of photography in dentistry was explained. There are many reasons for using dental photography today; the primary purpose of digital dental photography is recording accurately the clinical manifestations of the oral cavity. As a spin-off, secondary uses include legal documentation, publishing, education, communication with patients, dental team members, colleagues and technicians, and finally marketing. Each of these uses was explained to the students. Queries of the

delegates were welcomed and the answers of the topic were discussed by the organizing committee.

The session was concluded with vote of thanks given by Dr.Sujan Kumar

#### REPORT OF THE ACTIVITY:

Curricular activity of the department is deficient so we have conducted the value added courses so as to improve the curriculum.

**VALUE ADDED COURSE PROGRAMME**

**TOPICS: GERIATRIC DENTISTRY AND OBSTRUCTIVE SLEEP APNEA**

Introduction to geriatric dentistry

Introduction to Ob structive sleep apnea

Etiopathogenesis and causes

Age changes & psychology in geriatric patients

Diagnosis & management of OSA

Nutrition in geriatric patients

Pharmacological considerations in geriatrics

Treatment options in geriatrics

  
PRINCIPAL

SANGAREDDY Dist. - 502 294 (T.S.)

## MNR DENTAL COLLEGE AND HOSPITAL

SANGAREDDY

1. Name of the program: Geriatric dentistry and Obstructive sleep apnea

2. Justification:

The major drawback in oral health care of the elderly would be the underestimation of the oral health care needed by them. The dental care of the residents is often limited to emergency care and is not aimed at retaining teeth. Conversely, with changing attitudes the oral health goal should include: Keeping their teeth, keeping their teeth healthy, and keeping their teeth pretty.

Obstructive sleep apnea (OSA) is an increasingly common, chronic, sleep-related breathing disorder. OSA is characterized by periodic narrowing and obstruction of the pharyngeal airway during sleep. Untreated OSA is associated with long-term health consequences including cardiovascular disease, metabolic disorders, cognitive impairment, and depression. Common symptoms include excessive daytime sleepiness, fatigue, non-refreshing sleep, nocturia, morning headache, irritability, and memory loss. Untreated OSA is also associated with lost productivity and workplace and motor vehicle accidents resulting in injury and fatality. The costs of untreated OSA and sleep loss are substantial.

3. Conducted by:

1. Dr. Ravindra S V
2. Dr. Suman
3. Dr. Shanthi Priya

4. Number of students attended: 53

5. Report of the activity:

This online program was started on 6<sup>th</sup> April 2021. The session began with a welcoming note by Dr. Ravindra SV, MDS, Vice-principal, and HOD of the Oral Medicine & Radiology. A detailed PowerPoint presentation with visual effects was displayed by each speaker to catch the student's attention through the Zoom platform.

The content of the topic was well-explained to the students by the speakers at multiple sessions. Dr. Suman, MDS, Reader, Department of Prosthodontics, explained the importance of geriatric oral health, nutrition in old age and its implications for oral health care, Age changes, psychology, prosthetic considerations, preventive counseling, and pharmacological considerations. Dr. Ravindra SV, MDS, Vice-principal and HOD of the Oral medicine &

  
PRINCIPAL

Radiology has discussed etiopathogenesis and causes of obstructive sleep apnea. Dr. Shanthi Priya, the Professor, Department of Prosthodontics, addressed the significance of diagnostic criteria and treatment options for obstructive sleep apnea.

Queries of the delegates were welcomed and the answers were discussed by the speakers.

The session was concluded with a vote of thanks by Dr. Harsha.

6. Conclusion:

We have conducted this value-added course to enhance the knowledge and interest of the students on these topics.

## Definition of OS

- RDI > 5
- RDI > 20 increases risk of mortality
- RDI 20-40 = moderate, >40 = severe
- Upper Airway Resistance Syndrome
  - Shares pathophysiology with OSA
  - No desaturation, continuous ventilatory effort
- Snoring

## Pathophysiology of OSA

- Sites of Obstruction:
- Obstruction tends to propagate

NUMBER OF STUDENTS ATTENDED: 34

The Department of Prosthodontics and Crown & Bridge at MNR Dental College organized a comprehensive value-added program on "Prosthodontics Implications on TMJ Disorders" from the 17th to the 21st of November 2020. The program aimed to provide dental students with valuable insights into the interactions between prosthodontics and temporomandibular joint (TMJ) disorders. The event was conducted in Lecture Hall 2 of MNR Dental College and Hospital.

The program was well-attended by undergraduate students, creating a dynamic platform for knowledge exchange and interactive learning. The event featured a series of lectures presented by renowned experts in the field of prosthodontics and TMJ disorders. The program was structured to cover various subtopics, with each speaker delving into their respective areas of expertise. The schedule and speakers were as follows:

Topic: Prosthodontic Treatment Planning for TMJ Disorders

Speaker: Dr. Praveen

Topic: Occlusal Considerations in Prosthodontics and TMJ Disorders

Speaker: Dr. Prithvi

Topic: Implant-Supported Prosthesis and TMJ Health

Speaker: Dr. Suman

Topic: Complete Dentures and TMJ Dysfunction

Speaker: Dr. Shanthi Priya

Topic: Orthodontic-Prosthodontic Interplay in TMJ Disorders

Speaker: Dr. Harsha

Topic: Materials Selection and TMJ Health in Prosthodontics

Speaker: Dr. Praveen

  
PRINCIPAL

MNR Dental College & Hospital  
MNR Nagar, Narsapur Road,  
SANGAREDDY Dist. - 502 294 (T. N. S.)

The sessions were characterized by in-depth discussions, case presentations, and practical insights shared by the esteemed speakers. Each speaker provided a comprehensive overview of their respective subtopics, highlighting the interplay between prosthodontics and TMJ health. The students actively engaged in discussions, seeking clarifications and gaining valuable insights from the experts.

Dr. Harsha, who also welcomed the gathering, concluded the program by summarizing the key takeaways from each session and emphasizing the significance of interdisciplinary collaboration between prosthodontics and other dental specialties in the management of TMJ disorders.

The program was deemed successful as all queries raised by the students were addressed, ensuring a holistic understanding of the subject matter. The interactive nature of the sessions fostered a conducive learning environment that enriched the participants' knowledge and encouraged them to explore the intricate relationship between prosthodontics and TMJ disorders further.

7	Maintenance and Long-Term Prevention of Gingival Recession	Dr RUPA RANI	3 HOURS

NAME OF THE PROGRAMME: Treatment of gingival recession

JUSTIFICATION: one of the most common aesthetic concerns associated with the periodontal tissues is gingival recession. Although, it rarely results in tooth loss, marginal tissue recession

  
PRINCIPAL

MNR Dental College & Hospital  
MNR Nagar, Narsapur Road,  
SANGAREDDY Dist. - 502 294 (T.S.)

is associated with thermal and tactile sensitivity, aesthetic complaints and a tendency towards root caries, hence a deep insight into various treatment procedures for treatment of marginal gingival recession is required.

NUMBER OF STUDENTS ATTENDED: 36

Date: 8th February 2021 to 13th February 2021

Venue: Lecture Hall 2, MNR Dental College and Hospital

The Department of Periodontology at MNR Dental College organized a comprehensive value-added program on the "Treatment of Gingival Recession" from the 8th to the 13th of February 2021. The program aimed to provide dental students with a comprehensive understanding of the various aspects of gingival recession and its management. The event took place in Lecture Hall 2 of MNR Dental College and Hospital.

The program witnessed enthusiastic participation from undergraduate students, fostering an environment conducive to interactive learning and the exchange of knowledge. Renowned experts in the field of Periodontology delivered a series of informative lectures, each focusing on specific subtopics related to the treatment of gingival recession. The schedule, speakers, and subtopics were as follows:

Topic: Causes and Etiology of Gingival Recession

Speaker: Dr. B. Anitha

Topic: Classification and Grading of Gingival Recession

Speaker: Dr. Ravi Verma

PRINCIPAL

MNR Dental College & Hospital

Topic: **Surgical Techniques for Gingival Recession Treatment**

Speaker: **Dr. Deepika V**

Topic: **Minimally Invasive Approaches to Gingival Recession**

Speaker: **Dr. Srinivasulu**

Topic: **Orthodontic Considerations in Gingival Recession Management**

Speaker: **Dr. B. Anitha**

Topic: **Maintenance and Long-Term Prevention of Gingival Recession**

Speaker: **Dr. Rupa Rani**

The sessions were marked by engaging presentations, case discussions, and practical insights shared by the esteemed speakers. Each speaker provided a comprehensive overview of their assigned subtopics, ensuring that participants gained a well-rounded understanding of the subject matter. The students actively participated, raising queries and seeking clarifications, thereby enriching their knowledge.

All queries raised by the students were effectively addressed during the program, contributing to a thorough understanding of the treatment of gingival recession. The interactive nature of the sessions encouraged students to delve deeper into the subject matter, fostering a conducive learning environment.

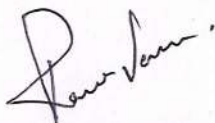

The Department of Periodontology extends its gratitude to the speakers for their invaluable contributions and the students for their active participation. The program undoubtedly played a significant role in enhancing participants' knowledge and insights into the management of

NUMBER OF STUDENTS ATTENDED: 29

- **Abstract main points:** A mixed dentition treatment can efficiently and effectively be provided using a 264 appliance. The indications for early treatment are discussed and advantages of fixed appliances over traditionally used removable appliances are mentioned.
- **Objectives:** The objective of the presentation was to highlight the importance of early correction of malocclusions.
- **Method of content delivery:** Power point presentation with neatly labelled figures and illustrations along with live demonstrations.
- **Brief discussion:** The programme was commenced with the welcome note lecture given by Dr. Dwijendra which highlights on "Active interception for early correction."

Active interception for early correction refers to a proactive approach in identifying and addressing issues or problems at an early stage to prevent their progression or negative consequences. In the context of correction, it often pertains to identifying and correcting developmental or behavioural concerns in individuals, particularly children, before they become more severe or difficult to manage.

Active interception for early correction involves early detection and intervention through systematic screening, assessment, and timely intervention strategies. This approach aims to identify potential issues or risk factors early on, allowing for targeted interventions that can help minimize the impact and improve outcomes.

In various fields, such as education, healthcare, and psychology, active interception for early correction is utilized to address a range of developmental, learning, and behavioral challenges. For

  
**PRINCIPAL**  
 MNR Dental College & Hospital  
 MNR Nagar, Narsapur Road,  
 SANGAREDDY Dist. - 502 294 (T.S.)

example, in education, it may involve early identification of learning difficulties in students and implementing appropriate interventions to support their academic progress. In healthcare, it may involve early diagnosis and intervention for medical conditions, such as detecting and treating developmental delays or identifying and addressing risk factors for chronic diseases.

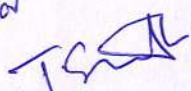

By implementing active interception for early correction, professionals and caregivers can take proactive measures to identify and address potential concerns before they become more complex or entrenched. This approach can significantly impact outcomes, as it allows for timely and targeted interventions that can improve overall functioning, well-being, and quality of life.

It is important to note that active interception for early correction requires collaboration and coordination among professionals, including educators, healthcare providers, psychologists, and parents or caregivers. Early detection and intervention often involve comprehensive assessments, evidence-based interventions, and ongoing monitoring to ensure the effectiveness of the strategies implemented.

In summary, active interception for early correction involves the proactive identification and intervention of issues or concerns at an early stage to prevent further negative consequences. This approach aims to minimize the impact of developmental, learning, or behavioral challenges through timely and targeted interventions. By addressing concerns early on, professionals and caregivers can enhance outcomes and support individuals in achieving their full potential.

### **Conclusion:**

Even though there may be slightly more chairside time required to fit the appliance, there is no laboratory cost involved as with a removable appliance. The advantages over this type of appliance are significant and include: Bodily movement of teeth if spaces needs to be created for an in standing incisor or recreated for an impacted late erupting incisor, torque of the incisor roots palatally to decrease the chance of relapse, as well as maximize the aesthetic result, Efficient and effective derotation of incisors.
