## FACULTY DEVELOPMENT PROGRAMME

### BARCODED PORCELEIN CROWNS - ACTIVITY REPORT

NAME OF THE FACULTY DEVELOPMENT PROGRAMME: BARCODED PORCELEIN CROWNS

JUSTIFICATION: Porcelain dental crowns are an excellent choice while recreating the form and function of a damaged tooth, because a crown basically replaces the entire external portion of the tooth down to the gum level but these crowns are not limited to simply replacing the original tooth, but can be designed to create an even better aesthetic appearance. Hence an insight into the usage of barcoded porcelain crowns is necessary.

CONDUCTED BY: Faculty development committee

AUDIENCE: Faculty of MNR Dental College and hospital.

DESCRIPTION OF THE PROGRAMME: The programme was conducted on 16<sup>th</sup> December 2017. The session began with a welcoming note by Dr. Prithvi Krishna. The speaker of the programme Dr. Nidhi Gupta addressed the students and welcomed their presence.

A detailed power point presentation was given on the topic barcoded porcelain crowns, uses and descriptive overview was presented. Later Dr. M. Praveen Kumar gave live demonstration on a model cast.

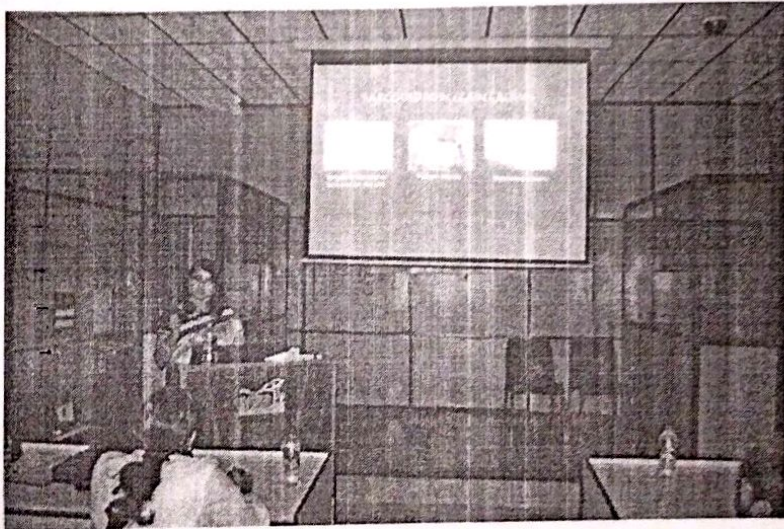

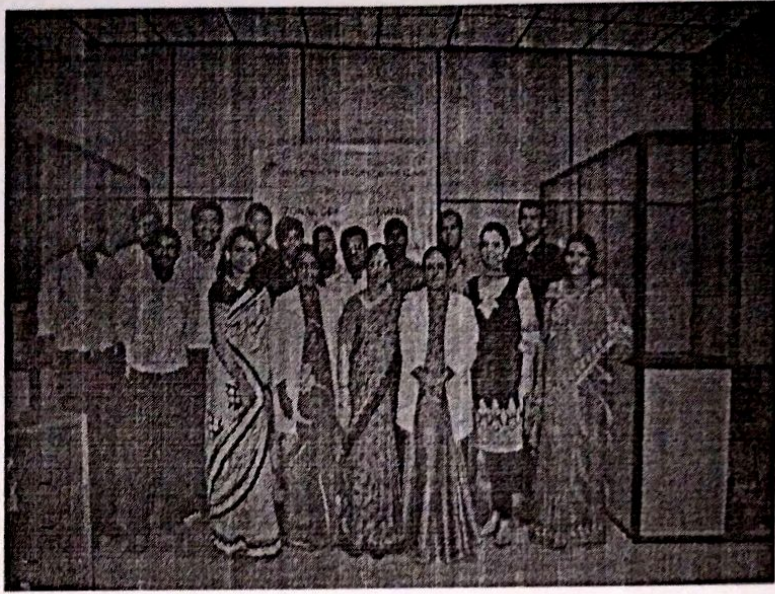

Queries of the delegates were welcomed and the answers of the topic were discussed by the organizing committee.

The session was concluded by the faculty development committee.

**MNR DENTAL COLLEGE AND HOSPITAL**

**SANGAREDDY, MEDAK DISTRICT**

**WORKSHOP**

**“TARGETING MYCOBACTERIAL SOS-A THERAPEUTIC STRATEGY FOR TB”**

**23<sup>rd</sup> OCTOBER 2017**

**Institution:** MNR Dental College & Hospital

**Guest speakers:** Dr. Saravanan Matheshwaran, Indian Institute of Science.

Organized by Faculty development committee; MNR Dental College, Sangareddy.

**Objective:** A lecture on targeting mycobacterial sos-a therapeutic strategy for TB has been conducted to discuss the beneficial therapeutic approach for tuberculosis .

**Content delivered:** Antimicrobial resistance is a pressing threat to global health, with multidrug-resistant pathogens becoming increasingly prevalent. The bacterial SOS pathway functions in response to DNA damage that occurs during infection, initiating several pro-survival and resistance mechanisms, such as DNA repair and hypermutation. This makes SOS pathway components potential targets that may combat drug-resistant pathogens and decrease resistance emergence. The virtual workshop discusses the mechanism of the SOS pathway and efforts to develop selective small-molecule inhibitors of these proteins. These inhibitors may serve as valuable tools for target validation and provide the foundations for desperately needed novel antibacterial therapeutics.

**Audience:** Staff, Post-graduates, Interns.

**Description of course:** The program was conducted on 23<sup>rd</sup> OCTOBER 2017. The event started with a welcome note following which inauguration was done by Dr.Sujatha Gopal; Principal, Professor & HOD Department of conservative and endodontics; MNR Dental college at 9.00 am. A detailed Power Point presentation by the guest speaker Dr. Saravanan Matheshwaran on the topic “TARGETING MYCOBACTERIAL SOS-A THERAPEUTIC STRATEGY FOR TB” from 10.00 am to 11.30 am was given followed by a tea break for 15 mins. He further spoke about causes and consequences of SOS induction, & also how this response can be modulated under various circumstances from 11.45am to 1.00 pm and queries were cleared. It was followed by group discussion with the staff and students. Later, Dr. Sujatha Gopal; addressed the gathering. The session was concluded with a vote of thanks. It was followed by lunch from 1.30 pm onwards.

**Attendance:** 31

**Conclusion :** SOS response plays an unsuspected role and deserves comprehensive attention. A preliminary understanding of the induction, molecular mechanism, and modulation of therapeutic drug resistance so as to search for effective ways to suppress the SOS network to

### LOCAL DRUG DELIVERY- ACTIVITY REPORT

NAME OF THE FACULTY DEVELOPMENT PROGRAM: LOCAL DRUG DELIVERY

INSTITUTION: MNR Dental College and hospital

RESOURCE PERSON: Dr.A.R.Pradeep, periodontist.

CONDUCTED ON: 7-11-2017

CONDUCTED BY: Faculty development committee

FACULTY INCLUDED: faculty members of MNR Dental College and hospital

DESCRIPTION OF THE PROGRAM: The session began with a welcoming note by Dr.B.Rupa Rani. A detailed power point presentation was given on local drug delivery and description about various drugs, their efficacy in treating periodontal conditions, mechanism of action and recent advances in local drug delivery were discussed. Later Dr.B.Anitha demonstrated a case using local drug delivery agents.

Queries of the delegates were welcomed and the topic was discussed. The programme ended with a vote of thanks by the faculty development committee.

## FACULTY DEVELOPMENT PROGRAMME

### WORKSHOP ON BASIC LIFE SUPPORT AND CPR

#### ACTIVITY REPORT

NAME OF THE FACULTY DEVELOPMENT PROGRAM: WORKSHOP ON BASIC LIFE SUPPORT AND CPR

CONDUCTED ON: 21-11-2017

CONDUCTED BY: FACULTY DEVELOPMENT COMMITTEE

INSTITUTION: MNR Dental College

RESOURCE PERSON: Dr.Shekar Reddy professor, dept of Oral and maxillofacial surgery (Panineeya mahavidyalaya institute of dental sciences)

FACULTY INCLUDED: Faculty of MNR Dental College

CONTENT DELIVERED: Basic Life Support, cardiopulmonary resuscitations

BRIEF DESCRIPTION: The program began with a welcoming note by Dr.Harsha, HOD of the dept oral and maxillofacial surgery. He addressed the gathering, Chief guest of the programme Dr.Shekar reddy, professor ,dept of oral and maxillofacial surgery ,Panineeya Dental college and hospital,Hyderabad.The speaker spoke on basic life support, how to manage airway,breathing,circulation and how to perform CPR.Followed by hands on workshop on dummy models.

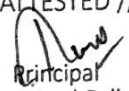

CONCLUSION: Significant knowledge on advances allows better understanding of multitude of factors that helps in the success of the treatment. Session concluded by hands on for the faculty members.

## FACULTY DEVELOPMENT PROGRAMME

### HEPATITIS B VACCINATION- ACTIVITY REPORT

NAME OF THE FACULTY DEVELOPMENT PROGRAMME: HEPATITIS B VACCINATION

JUSTIFICATION: Globally, Hepatitis B Virus [HBV], the major cause of liver cancer and leading cause of death worldwide. HBV is a vaccine preventable disease and the vaccination remains the most effective & cost saving strategy to prevent infections and the long term consequences. The HBV is known as a blood borne virus because it is transmitted via blood or fluids contaminated with blood. The measures should be taken to prevent needle prick injuries heading virus infected instruments.

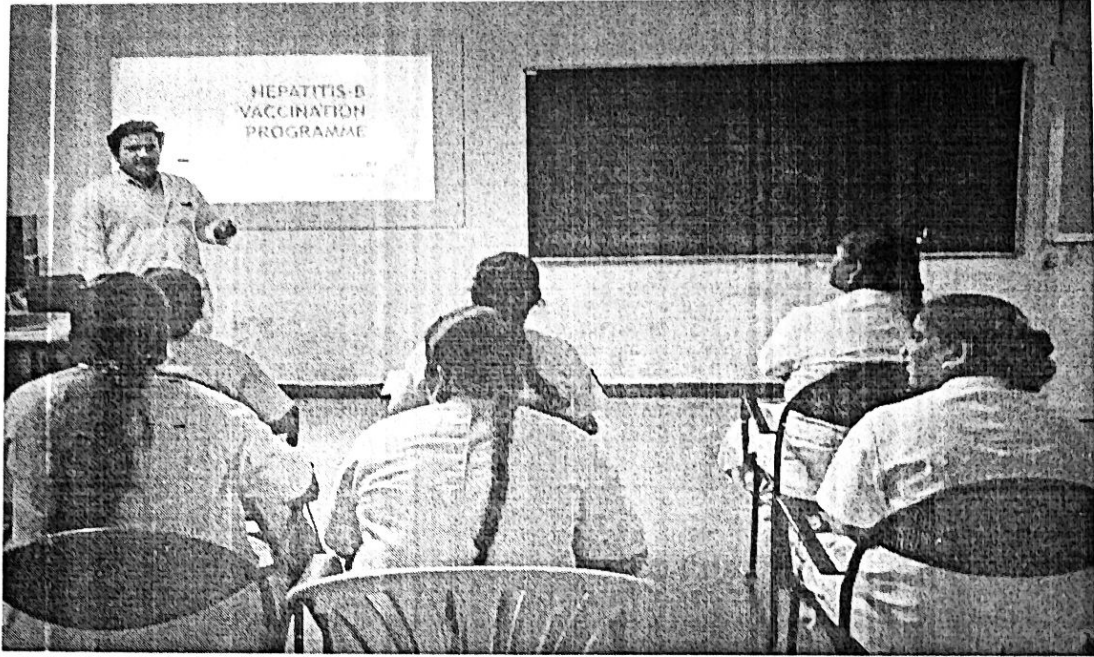

CONDUCTED BY: Faculty Development Committee
